Prototype Designers:

TUQUIB, GIAN CARLO
LIMA, RALPH JAMES
MIRAVELES, ALSERGE VINCENT

Project Title:

**Syllabus Repository, Revision and
Versioning System (SRVS)**

RELEASE NOTES

Application for 25 %, Version # 1

Approved by:

Engr. Eutequio III Zante L.
Palermo

Ms. Jullene Jane
Evangelista

NEW FEATURES	FOR IMPROVEMENTS	FIXES
<i>To be enumerated here are those that are not yet added in the previous iteration</i>		

Test no.	Test	Expected Result	Pass/Fail	Corrective action
1	API Structure	The API is properly structured, with organized endpoints that allow the system components to communicate and process requests correctly.		
2	Database Schema	The database schema is properly structured, with the required tables, fields, relationships, and constraints needed to store and manage system data correctly.		
3	Account Registration	New users can successfully register an account by providing the required information, and their account details are securely stored in the database.		
4	User Login	Registered users can successfully log in using valid credentials, while invalid credentials are rejected with an appropriate error message.		

5	Forgot Password	Users can successfully request a password reset using their registered account information and reset their password through the provided recovery process.		
---	-----------------	--	--	--

Additional Feature: *(those not mentioned in the approved proposal)*
