LIMA, RALPH JAMES
MIRAVELES, ALSERGE VINCENT

Project Title:

**Syllabus Repository, Revision and
Versioning System (SRVS)**

RELEASE NOTES

Application for 25 %, Version # 1

Approved by:

Engr. Eutequio III Zante L.
Palermo

Ms. Jullene Jane
Evangelista

NEW FEATURES	FOR IMPROVEMENTS	FIXES
<i>To be enumerated here are those that are not yet added in the previous iteration</i>		

Test no.	Test	Expected Result	Pass/Fail	Corrective action
1	Account Registration	New users can register successfully and their account information is stored in the system administrator.		
2	User Login Authentication	Users can successfully log in using valid credentials and are redirected to their assigned dashboard based on role.		
3	Role-Based Access Control	Admins, Department Heads, Educators, and Students can only access features assigned to their roles.		
4	Dashboard Monitoring	The dashboard correctly displays syllabus statistics, pending approvals, and recently updated files in real time.		

5	API Request Validation	The API validates required fields and prevents invalid or incomplete requests from being processed.		
6	Forgot Password	The system validates the user's registered email address and securely processes password reset requests.		
7	Database Configuration Setup	The application connects successfully to the configured database using the correct connection settings.		

Additional Feature: *(those not mentioned in the approved proposal)*
